

NAKED

+ Two-position Collapsible Baby Bathtub

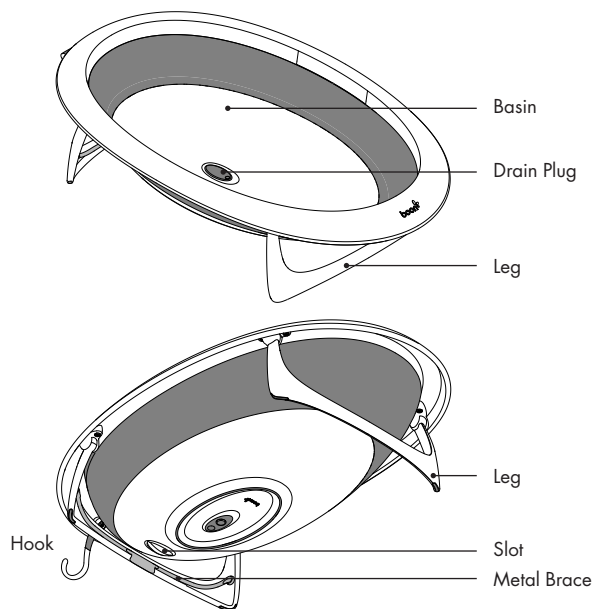

Instructions

0-18
Months

⚠ WARNING – DROWNING HAZARD

- Infants have DROWNED in infant bath tubs.
- ALWAYS keep infant within adult's reach.
- NEVER lift this product with infant in it.
- NEVER place this product in water in an adult bath tub or sink.
- ALWAYS keep the drain open in the adult bath tub or sink.
- Infants can drown in as little as 1 inch of water.
- ALWAYS bathe your infant using as little water as necessary.
- NEVER allow other children to substitute for adult supervision.
- Discontinue use of the product if it becomes damaged, broken, or disassembled.

Naked can be used in two different positions, depending on the age of your child.

POSITION 1 - NEWBORNS

THE RECLINE POSITION IS INTENDED FOR NEWBORNS. THIS POSITION CREATES A SMALL BASIN FOR NEWBORNS, HELPING KEEP THEIR HEAD ABOVE WATER.

POSITION 2 - INFANTS TO TODDLERS

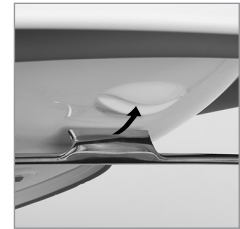

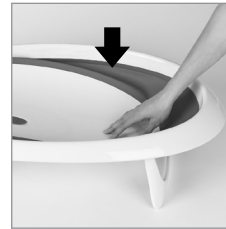

THE FULLY EXPANDED BASIN POSITION IS INTENDED FOR BABIES WHO ARE ABLE TO SIT UPRIGHT UNSUPPORTED.

1. Place tub upside down and unfold both support legs outward until they snap into their locked positions. Turn Naked right side up.
2. Set Naked on flat, level surface, such as the bottom of a bathtub or the floor.

⚠ WARNING:

Never use Naked on a raised surface. Always keep the drain open in an adult bathtub or sink when using Naked.

3. For POSITION 1, push the flexible basin down only at the end opposite the hook. Rotate the metal brace away from the leg towards the underside of the basin and position brace into slot on bottom of basin.

4. For POSITION 2, push the flexible basin down until all sides are fully extended. Do not use the metal brace.
5. Make sure the basin's drain plug is securely fitted into the drain hole before filling the tub.
6. Fill the tub with the minimum amount of water to a level that is well below baby's neck. Always test the water temperature and water level before placing your baby into Naked.

⚠ WARNING:

The typical water temperature for bathing a baby should be between 90 and 100°F (32.2 and 37.8°C). Infants can drown in as little as 1 inch of water; ALWAYS bathe your infant using as little water as necessary.

7. After bathing and removing your baby from Naked, drain water from Naked by lifting the drain plug, and rotating to the side. Tilt Naked to drain water.
8. Once Naked has completely drained, turn it upside down on a flat surface and push down on the flexible bottom until it is fully collapsed.
9. If using POSITION 1, rotate the brace back towards the leg and lock it into place.
10. To collapse the legs, gently pull up from the center of each leg to release from locked position, and fold them in toward the center of Naked.

11. Rotate hook out and hang to dry.

CLEANING & CARE

Before first use and after each use, clean Naked with a soft cloth using warm water and mild soap. Dry with soft towel or hang to dry using hook. Before each use, inspect Naked to be sure that all parts are correctly positioned and locked.
